

6612 Style Time Zone Clock

Model 6612Q - 4.0" time, 10 character - 2.0" zone labels, 12 zones

The 6612 series time zone clocks have bar-segment LED time displays with ten character dot matrix digital zone labels in multiple rows and columns. In many 6612 models, the clock can display up to 24 time zones through page flipping. For example, a eight zone clock can show three pages of time zone information. Likewise, a twelve zone unit can show two pages.

Each 6612 clock comes standard with an OCXO oscillator, which is accurate to .06 seconds per year.

For easy clock management, an infrared (IR) remote control is included with every 6612 model. You can specify a radio (RF) remote, if preferred for no additional charge. Every 6612 model includes your choice of an Ethernet or USB interface for easy time zone parameter control.

Features:

- OCXO oscillator accurate to .06 seconds per year
- 1.8", 2.5" or 4.0" red bar segment LEDs for displaying time* (blue & green optional)
- 1.2" or 2.0" red 10 character alpha numeric dot matrix LEDs for displaying zone names* (blue, green & yellow optional)
- Models that display from 4 to 12 separate time zones
- Zone flipping feature that allows up to 24 zones in a single clock*
- 12 or 24 hour format
- DST and time zone offsets supported
- PC Interface: USB Interface
- IR remote control standard or optional RF remote
- Black brushed Aluminum frame
- Multiple cord lengths available
- US, British, Australian or European plugs
- 100-240 VAC. 50-60 cycle power
- Available on GSA, contract GS-02F-0030U

*See individual model number for details.

Oven Controlled Crystal Oscillator (OCXO)

- Accurate to 2 PPB (parts per Billion) or .06 seconds per year or about 1 second in 20 years.
- 1 thousand times more accurate than most competing clocks
- Eliminates the need for GPS or Network time synchronization for

6612 Style Time Zone Clocks
