- 1-year warranty

Model # RSEN200

## Field Signal Tester

Model # FT2

All master clocks come with a signal tester, shown in the photo above. The signal tester helps with site surveys and testing for the analog signal in remote areas of your facility.

## Master Transmitter Signal Monitor & PC Time Synchronizer

Model # WTM

A very useful accessory that is available for your master transmitter is the Signal Monitor/PC Time Synchronizer, shown in the photo above.

The signal monitor alerts you if the master transmitter fails to broadcast. This device assures that the system is in a constant state of readiness.

## Master Transmitter Antenna

Model #  
ANTMAST

Each Master Transmitter ships with a 44" mast antenna for placing outdoors.

## GPS Antenna

If you purchase a master Transmitter with the GPS option, you will receive a GPS Antenna that can be mounted either in an indoor window or outdoors.
