

RC201/RC202 Wireless Indoor Speakers

The DuraTime Wireless Indoor Speakers are a perfect way to add audio tones to a facility without the expense of adding costly wiring. The speaker features a highly reliable DuraTime Transceiver allowing you to send pre-recorded sounds, tones and messages throughout your facility.

These speakers also include an NFPA 72 recommended Amber LED strobe light that flashes when a tone is being broadcast. This will alert the hearing impaired.

Simply mount the indoor speaker housing in a location where you need to notify people and plug in the provided AC adapter to 110 VAC or supply 12VDC power. The speaker is activated through the DuraTime Wireless Software that comes with your System.

A RC102 Master Clock package is required to operate the system.

Model # RC201

Model # RC202
