

BRG Precision Products, Inc. Environmental Statement

BRG Precision Products is committed to our employees and community to be an environmentally conscious company. BRG Precision Products is dedicated to producing quality electronic time displays in a responsible manner. BRG Precision Products is taking the following measures to ensure that we do our part as a steward of the environment.

- Only high efficiency “switching type” power supplies are used. No high current consumption “transformer type” power supplies are used.
- Only high efficiency “switching type” dimming circuits are used. No high current consumption “resistance type” circuits are used to dim the displays.
- Only high efficiency Light Emitting Diodes (LED’s) are used. No high current consumption incandescent bulbs are used in our displays.
- Company-wide, BRG Precision Products employees recycle paper, cardboard and aluminum cans.
- Currently our standard packaging consists of 35% recycled fibers with some pieces consisting of 100% recycled fibers.
- Hazardous chemicals are recycled into other durable products.

BRG Precision Products will pursue a continuous improvement process, searching for and applying new methods and products to protect and enrich our environment.
