

# BRGQ Take-A-Number Installation for Aluminum Frame

- 1.** Tools Needed
- Drill with 5/16" bit
  - Phillips Screwdriver
  - Pen or Pencil
  - Tape Measure
  - Hammer

The BRGQ64, BRGQ28, BRGQ48 & BRGQ68 Systems comes with an LED Display, power cord, remote control, ticket dispenser (floor or counter-top) & a roll of tickets

**Mounting Brackets**

Locate where to install the LED Display. Measure the width of the LED Display. Mount the brackets at least 2" from each end of the clock.

Example: if the Clock is 24.25 inches wide, mount the brackets at 22" apart.

Make sure that the mounting brackets (red line) is above the electrical outlet.

Mark the holes for the four mounting screws.

Using the 5/16" drill bit and drill, drill a hole at the four marks on the wall.

Insert the four plastic keepers that came in the hardware bag into the holes. Using a hammer, lightly tap on the keepers until they are flush with the wall.

**Cross section example**

Using a Phillips screwdriver or driver bit and drill, mount the BRG EasyMount brackets utilizing the four screws that were provided in the hardware bag into the plastic keepers. Tighten the screws.

Plug the power cord into the outlet.

Lift the LED display up above the mounting brackets then ease the display down onto the brackets. Tuck the unused power cord behind the clock and you're finished with install

# BRGQ Take-A-Number Ticket Dispenser Assembly

## Adjustable Countertop Stand Model

Scan for  
Video

1.

Included:

- Floor Stand base & pole
- Take-A-Number Sign with two brackets attached
- Ticket Dispenser
- Roll of Tickets

No Tools Required

2.

Screw the pole into the base of the countertop stand until tight.

3.

Place the Take-A-Number sign on the top of the countertop stand like in the photo above. Using the round nut, hand tighten the nut on the top of the stand to hold the sign tight to the stand.

4.

The Ticket Dispenser has two posts on the back of the unit that snap into the two holes in the mounting bracket. Line up the bottom post to the bottom hole and lift up/push back on the dispenser and it will snap into place.

5.

Now you are ready to load the roll of tickets

6.

Pull the black latch on the dispenser down and lift the top of the dispenser up to load the roll of ticket numbers.

7.

Place the ticket roll into the dispenser and route the tickets down through the latch.

8.

Close the dispenser and latch it. Adjust your LED Display to reflect the next number in the dispenser.
